Volume 10572

Proceedings of SPIE 0277-786X, V. 10572

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

13th International Conference on Medical Information Processing and Analysis, edited by Eduardo Romero,
Natasha Lepore, Jorge Brieva, Juan David García, Proc. of SPIE Vol. 10572, 1057201
© 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2310208

Proc. of SPIE Vol. 10572 1057201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii Authors
- ix Conference Committee
- xiii Introduction

DIGITAL PATHOLOGY

- 10572 02 **Quantifying expert diagnosis variability when grading tumor-infiltrating lymphocytes** [10572-74]
- 10572 03 **A lymphocyte spatial distribution graph-based method for automated classification of recurrence risk on lung cancer images** [10572-20]
- 10572 04 **A sparse representation of the pathologist's interaction with whole slide images to improve the assigned relevance of regions of interest** [10572-28]
- 10572 05 **Scoring nuclear pleomorphism using a visual BoF modulated by a graph structure** [10572-69]

OTHER MODALITIES

- 10572 06 **Modelling and validation of diffuse reflectance of the adult human head for fNIRS: scalp sub-layers definition** [10572-35]
- 10572 07 **Supporting the potential of quantitative ultrasonic techniques for the evaluation of platelet concentration** [10572-83]
- 10572 08 **Tumor angiogenesis assessment using multi-fluorescent scans on murine slices by Markov random field framework** [10572-36]

MOTION AND GAIT ANALYSIS

- 10572 09 **Normal human gait patterns in Peruvian individuals: an exploratory assessment using VICON motion capture system** [10572-66]
- 10572 0A **Quantifying gait patterns in Parkinson's disease** [10572-58]
- 10572 0B **Quantifying stimulus-response rehabilitation protocols by auditory feedback in Parkinson's disease gait pattern** [10572-64]
- 10572 0C **Cerebral palsy characterization by estimating ocular motion** [10572-68]

BRAIN

- 10572 0D **Examination of corticothalamic fiber projections in United States service members with mild traumatic brain injury [10572-9]**
- 10572 0E **Volumetric multimodality neural network for brain tumor segmentation [10572-40]**
- 10572 0F **Gaussian mixture models for detection of autism spectrum disorders (ASD) in magnetic resonance imaging [10572-26]**
- 10572 0G **Brain cortical structural differences between non-central nervous system cancer patients treated with and without chemotherapy compared to non-cancer controls: a cross-sectional pilot MRI study using clinically indicated scans [10572-61]**

ALZHEIMER'S DISEASE

- 10572 0H **Quantifying cognition and behavior in normal aging, mild cognitive impairment, and Alzheimer's disease [10572-80]**
- 10572 0I **Characterizing brain patterns in conversion from mild cognitive impairment (MCI) to Alzheimer's disease [10572-71]**
- 10572 0J **Deep-learning-based classification of FDG-PET data for Alzheimer's disease categories [10572-84]**
- 10572 0K **Detection of the default mode network by an anisotropic analysis [10572-62]**

E-HEALTH AND PATIENT EMPOWERMENT

- 10572 0L **Empowerment of diabetic patients through mHealth technologies and education: development of a pilot self-management application [10572-47]**
- 10572 0M **Phase-based motion magnification video for monitoring of vital signals using the Hermite transform [10572-52]**
- 10572 0N **Brain-computer interface based on detection of movement intention as a means of brain wave modulation enhancement [10572-53]**

FETAL AND PEDIATRIC BRAIN IMAGING

- 10572 0O **Cranial thickness changes in early childhood [10572-75]**
- 10572 0P **Altered network topology in pediatric traumatic brain injury [10572-16]**
- 10572 0Q **Statistical shape (ASM) and appearance (AAM) models for the segmentation of the cerebellum in fetal ultrasound [10572-32]**
- 10572 0R **Bayesian automated cortical segmentation for neonatal MRI [10572-14]**

SIGNAL ANALYSIS

- 10572 OS **Analysis of sEMG signals using discrete wavelet transform for muscle fatigue detection** [10572-46]
- 10572 OT **Wavelets analysis for differentiating solid, non-macroscopic fat containing, enhancing renal masses: a pilot study** [10572-44]
- 10572 OU **Multi-channel non-invasive fetal electrocardiography detection using wavelet decomposition** [10572-76]
- 10572 OV **Fetal ECG extraction using independent component analysis by Jade approach** [10572-55]

MRI PHANTOMS

- 10572 0W **Manufacture and characterization of breast tissue phantoms for emulating benign lesions** [10572-38]
- 10572 0X **Design and implementation of a MRI compatible and dynamic phantom simulating the motion of a tumor in the liver under the breathing cycle** [10572-19]
- 10572 0Y **Construction of mammography phantoms with a 3D printer and tested with a TIMEPIX system** [10572-25]
- 10572 0Z **Feasibility study of a TIMEPIX detector for mammography applications** [10572-30]

IMAGE PROCESSING

- 10572 10 **Retinal blood vessel segmentation in high resolution fundus photographs using automated feature parameter estimation** [10572-8]
- 10572 11 **Recognition of skin melanoma through dermoscopic image analysis** [10572-50]
- 10572 12 **Learning to segment mouse embryo cells** [10572-59]

RADIATION THERAPY PLANNING

- 10572 13 **Prostate cancer: computer-aided diagnosis on multiparametric MRI** [10572-4]
- 10572 14 **Quantification of dose uncertainties for the bladder in prostate cancer radiotherapy based on dominant eigenmodes** [10572-7]
- 10572 15 **Improvement of Bragg peak shift estimation using dimensionality reduction techniques and predictive linear modeling** [10572-18]
- 10572 16 **Towards an integrative computational model for simulating tumor growth and response to radiation therapy** [10572-31]

ARTIFICIAL NEURAL NETWORK

- 10572 17 **Bone age detection via carpogram analysis using convolutional neural networks** [10572-45]
- 10572 18 **Automated detection of lung nodules with three-dimensional convolutional neural networks** [10572-48]
- 10572 19 **Characterization of physiological networks in sleep apnea patients using artificial neural networks for Granger causality computation** [10572-12]

HEART

- 10572 1A **Fusion of 4D echocardiography and cine cardiac magnetic resonance volumes using a salient spatio-temporal analysis** [10572-49]
- 10572 1B **Detection of MRI artifacts produced by intrinsic heart motion using a saliency model** [10572-51]
- 10572 1C **Acute effect of Vagus nerve stimulation parameters on cardiac chronotropic, inotropic, and dromotropic responses** [10572-77]
- 10572 1D **Validation of a finite element method framework for cardiac mechanics applications** [10572-78]

DEEP LEARNING AND DEEP ARCHITECTURES

- 10572 1E **Automatic diabetic retinopathy classification** [10572-39]
- 10572 1F **Semantic knowledge for histopathological image analysis: from ontologies to processing portals and deep learning (Invited Paper)** [10572-33]
- 10572 1G **Combining morphometric features and convolutional networks fusion for glaucoma diagnosis** [10572-57]

MEDICAL SOFTWARE DEVELOPMENT

- 10572 1H **A robustness test of the braided device foreshortening algorithm** [10572-72]
- 10572 1I **NecroQuant: quantitative assessment of radiological necrosis** [10572-24]
- 10572 1J **Open-source software platform for medical image segmentation applications** [10572-5]
- 10572 1K **A quantitative reconstruction software suite for SPECT imaging** [10572-10]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

The papers in this volume were part of those presented and submitted to the 13th International Symposium on Medical Information Processing and Analysis - SIPAIM 2017. The event, held for the first time in San Andres Islands, Colombia, has evolved from a small meeting to an international symposium in which researchers from Latin America meet and interact with each other and with their peers from around the world.

SIPAIM is mainly focused on bringing together the Latin American medical image analysis and information processing communities and on creating a forum in which to discuss recent results, ongoing research, and future projects and collaborations. SIPAIM is addressed to researchers, students and professionals in a wide range of disciplines including engineering, physics, mathematics, computer science, biology, and health sciences. This year's meeting included keynote lectures by five internationally recognized experts in digital histopathology, magnetic resonance imaging, computational anatomy, and geometrical and statistical pattern recognition.

Of the 74 papers submitted this year, 57 were accepted for oral presentations after being reviewed by at least three experts in the area. The wide array of subjects, ranging from digital pathology to gait analysis and from e-health to fetal and pediatric brain imaging, bears witness to the growing importance of medical and biomedical research among the region's researchers, and points to many opportunities for international collaborations.

The editors would like to thank the authors, reviewers and committee members, without whom the present volume would not have been possible. Likewise, we would like to thank SPIE whose support has improved the quality and visibility of the SIPAIM proceedings year after year. Finally, for the first time this year, we were also sponsored by the MICCAI society, and would like to thank them for their help in publicizing the conference.
